

1-My project: Build a NAS with Openmediavault.

2-Reason: it seems interesting for me, i didn't hear about that before and i'd like to do this project.

3-Possible problems:

- sources.
- Steps of the processing.

4-Problems solutions:

- I will try to collect information as much as i can.
- I will go over the project step by step.
- I will ask my professor for any question i have.

5-The benefits: It will help me getting familiar with my major, it will help me improving my skills in IT.
